Recommendation, Álex Rodríguez Benítez

I am writing to wholeheartedly recommend Álex Rodríguez Benítez for his exemplary work as a software developer intern at vocational school Mercantec, Denmark. During his 8-week tenure, Alex demonstrated a remarkable combination of technical proficiency, creativity, and dedication that greatly contributed to our organization's success.

From day one, Alex exhibited a strong grasp of software development principles and quickly embraced our organization and standards. His team created 3dprintarchive.socdata.dk, and Alex showed great responsibility for the entire project, with a deep understanding for the purpose of the project, for planning the work and for keeping deadlines.

Alex naturally took the role as team leader and contributed to a collaborative and productive work environment. His positive attitude and excellent communication skills make him a pleasure to work with. His team made several improvements to the project during their work, and only asked for approval for their ideas, and otherwise were completely autonomous.

In summary, Alex possesses all the qualities that make a successful software developer. He is innovative, diligent, and passionate about his work. I have no doubt that he will excel in any future endeavors and make a significant impact wherever he goes.

I highly recommend Alex for any position or opportunity he may pursue. He has my full support and confidence.

Sincerely,

Bjarne Rasmussen
